

Fire Prevention Week 2021 Welcome!

Greetings schools and staff,

Fire Prevention Week is now here and although unfortunately we are not visiting the schools in person, we made a video we'd like you to share with your students. The fire safety video highlights this year's national theme of *Learn the Sounds of Fire Safety* and our firefighters teach fire safety from one of our local stations. This video may be found on the Central County Fire Department's website or by following this link [teachers toolkit resources](#). In addition to the video, this Fire Safety Tool Kit offers safety lessons and activities you may discuss and work on with your students inside the classrooms.

Also within the Fire Safety Tool Kit:

- Lessons and activities
- Guidelines for schools and students to create a fire safety drawing. Once you've worked through the lessons and activities, we invite your students to share what they've learned on fire safety by creating a fire safety drawing that we may share on our Instagram and Twitter pages during the month of October.
- A blank drawing worksheet which students may use to share their knowledge of fire safety.
- A letter to parents/guardians on home safety lessons and activities the family can do at home. (Please forward this email to the parents of your students so they may also participate in the importance of fire safety in their homes with the entire family.)

Thank you all for what you do and for promoting a fire safe environment for our students.

Sincerely,

Darrick Figg, Fire Prevention Specialist
Central County Fire Department
