CHAPTER 2

Equipment Guides

Many of the tools on the rescue are considered “Seldom Used”... This Chapter will be a collection point for short videos basic set-up, operation, and maintenance on some of the equipment on USAR 133.

CHAPTER 3

ICS US&R 120-1 *November '14*

The US&R Type-1 Operational Level represents the minimum capability to conduct safe and effective search and rescue operations at structure collapse incidents involving the collapse or failure of heavy floor, pre-cast concrete and steel frame construction, high angle rope rescue , permit required confined space rescue , and mass transportation rescue. In this chapter you will see what equipment is required by State OES to be recognized as a US&R Type-1 Heavy rescue. If a listed item goes Out of Service or missing notify the US&R133 Captain immediately.
